CAREER OBJECTIVE

I am a potential software engineer who loves to create innovative and high performance web applications using different tools including React, Framer motion, anime.js and shadcn UI. Anticipating to create scalable, visually attractive web applications and solving issues in the real world.

EDUCATION

B.Tech - CSE(AIML specialization) Currently in the 6th semester
Kalasalingam Academy of Research and Education
CGPA: 9.18/10

08/2023 - Present

SKILLS

Languages: JavaScript, Python
Frontend: HTML, CSS, React.js, Next.js, Tailwind CSS
UI Libraries: Framer Motion, Anime.js, shadcn ui
Backend: Node.js, Express.js
Databases: MongoDB, Supabase
Cloud: GCP, AWS S3, Cloudinary
Tools: Git, GitHub, Docker, REST APIs

EXPERIENCE

Web developer Intern, Zidio Development

16/06/2025 - 23/08/2025

Built a data visualization website for Excel file analysis with customizable 2D/3D graph plotting, Implemented dynamic axis selection and interactive charting using libraries (Three.js, Plotly, Chart.js) and Integrated an AI-powered chatbot to suggest best-fit graphs, improving usability for non-technical users.

Web Developer, Google Developers Group(GDG) KARE

02/2025 – Present

Led workshops and mentorship programs that impacted 500+ students across multiple academic levels, fostering technical growth and collaboration. Developed a feedback-driven web application, streamlining event evaluations and helping identify high-demand topics for future sessions, resulting in improved student interaction.

Lead Organizer, Google Developers Group(GDG) KARE

08/2025 – Present

Selected through a competitive interview process by Google to be a leader for the GDG chapter at KARE. Lead the organization of tech events and workshops, mentoring students, and collaborating with industry experts to develop software products. Oversee a team of 13 core team members and coordinate activities for a chapter of over 1,300 active members.

PROJECTS

TechNav | [LINK](#)

Developed an AI-powered personalized learning platform that analyzes user knowledge to generate structured learning roadmaps with curated resources, concept-based quizzes, and a progress analytics dashboard, built using a RAG-based architecture to retrieve relevant domain knowledge, implemented with Next.js, React.js, Node.js, Supabase.

AI Powered Mock Interview | [LINK](#)

Developed a placement preparation web platform simulating real recruitment workflows including aptitude tests, technical interviews, and HR rounds with a personalized feedback and recommendation system to highlight strengths and improvement areas. Integrated a video analyzer to evaluate candidate introductions on visual and vocal delivery, and a resume analyzer to assess CV quality and provide actionable improvement insights.

HackArena | [LINK](#)

Developed a Hackathon Management Platform to streamline multi-round hackathons by enabling participant registration, team formation (2–4 members via invite links), round-wise submissions, quiz evaluation, and rubric-based judging. Designed a role-based architecture with Participant, Organizer, and Judge panels to manage rounds, submissions, scoring, and controlled leaderboard release. Built using Next.js (React), Supabase (PostgreSQL, Auth, Storage), and TailwindCSS with a Google-style UI.
